

21 June 1978

MEMORANDUM FOR: Deputy Director for National Foreign Assessment
FROM: Director of Central Intelligence
SUBJECT: PRM/NSC-37

Attached is Presidential Review Memorandum/NSC-37 on Chemical Weapons. Some time ago I discussed with Sayre the desirability of having several analysts put together a paper on the possibility of chemical warfare, with one analyst taking a position that it was a high probability, and another that it was not. I think as background to this PRM and whether specifically requested or not, we should do some form of analysis of the probability of the use of chemical weapons:

- a. Peacetime terrorist events.
- b. *etc.*
- c. *etc.*
